

Secure Digital Transformation

AWS Well Architected Framework Workshop

MIS3 Inc. AWS Workshop includes:

Virtual consulting for clients to educate them on the 5 core design principles for building natively inside AWS public cloud.

Involves the following:

- Operational Excellence
- Security
- Reliability
- Performance Efficiency
- Cost Optimization

MIS3 Inc. is an accredited AWS partner in Canada providing public and hybrid cloud solutions.

Achieve a consistent quality of experience both in AWS and on premise.

MIS3 Inc. can help you visualize and understand how to achieve invisible infrastructure to run your applications and their dependencies inside AWS.

Using the 5 core pillars and design principles from AWS to drive consistency into building and adopting a Well Architected design framework.
