Secure Digital Transformation

APPLICATION RATIONALIZATION AND DEPENDENCY MAPPING

MIS3 Inc. provides a 360 degree view for IT and how it aligns to the business objectives.

The vision requires a central focus on the applications and services with a deep dive into the portfolio for every organization.

Application Rationalization Methodology:

- Inventory all applications
- Define purpose of each application and business value alongside application owner.
- Understanding the different users of each application.
- Mapping the infrastructure dependencies for all applications from the top down bottom up.

\$75,000 - \$165,000 CAD
